The scope of the most pressing environmental problems far exceeds the capacity of individual nation-states, much less smaller political entities. This disjuncture between the enormous scale of challenges confronting the global community and the inadequacy of existing governmental mechanisms is, of course, a familiar feature of international affairs in the era of accelerated globalization since the end of the Cold War. As this book shows, nation-states have long sought agreements to manage migratory wildlife, just as they have negotiated conventions governing the exploitation of rivers and other bodies of water. Similarly, nation-states have long attempted to control resources beyond their borders, to impose their standards of proper environmental exploitation on others, or to draw on expertise developed elsewhere to cope with environmental problems at home. This collection examines this little-understood history, providing context, reference points, and even...
